

**Your safe storage  
with the Culture Collection  
of Switzerland**

## Your safe storage with the Culture Collection of Switzerland

Deposit a copy of your cell cultures, yeast or bacterial strains at the CCOS to ensure that these valuable resources are preserved at an additional safe location.

CCOS uses an isothermal liquid nitrogen vapour storage system that allows frozen sample storage at liquid nitrogen temperature without the samples coming into direct contact with liquid nitrogen.

The temperature is continuously monitored and documented. Stored cells are constantly maintained under optimal conditions.

Thank you for your interest in our services and products. We look forward to supporting your research with our services. Please contact us by email ([info@ccos.ch](mailto:info@ccos.ch)) for an offer or visit our website ([www.ccos.ch](http://www.ccos.ch)) for further information.
